

Profile

Systems Engineer with strong skills in development, operations and lifecycle management.

Working since 2013 as a polyglot full-stack developer, follower of good principles like SOLID, DRY and TDD in my code and who has introduced DevOps techniques such as continuous deployment in different projects.

Equally effective in a team environment or as a lone specialist.

Technical Skills

Programming: Python, Javascript, Go, Bash, HTML/CSS, Flask, SQLAlchemy, Django, VueJS, React, Celery, PyTest, Jest

Infrastructure: Linux (debian-based), PostgreSQL, NGINX, Redis, RabbitMQ

Operations/Management: Git, Docker (docker-compose), GitLab-CI, Ansible, Click

Employment History

Software Engineer

Analytics Fire, Bogotá, Colombia 03/19 - 09/19

Full-stack developer for multiple clients, including a medical device supply company and a solar energy company, using python mainly with Flask, SQLAlchemy and Celery, or Javascript with node, express, TypeScript, Webpack and React. The infrastructure is primarily handled with Docker, circleci and task runners such as Invoke.

- Development of new features and bug fixing in the back-end of multiple applications, both in node and in python, updating libraries and deployments.
- General maintenance of the front-end of multiple applications, primarily react or angular based.
- Database administration, including handling migrations and automating the edition and creation of records as well as moving and maintaining the databases. PostgreSQL.
- Set-up and update of local development environments, primarily using docker and task handling tools.
