Luis Orduz

Bogotá, Colombia Email: hire@luord.com

Profile

Systems Engineer with strong skills in development, operations and lifecycle management.

Over five years of experience as a polyglot full-stack developer, follower of good principles like SOLID, DRY and TDD in my code and who has introduced DevOps techniques such as continuous deployment in different projects .

Equally effective in a team environment or as a lone specialist.

Technical Skills

Programming: Python, Javascript, Bash, HTML/CSS, Flask, SQLAlchemy,

Django, VueJS, AngularJS, Foundation, Celery

Infrastructure: Linux (debian-based), PostgreSQL, NGINX, Redis, RabbitMQ

Operations/Management: Git, Docker (docker-compose), GitLab-CI, Ansible, Click

Employment History

Software Developer (Backend) BairesDev, Bogotá, Colombia 11/17 - Present

Full-stack developer with a primary focus in the backend for one of the clients, a marketing research company, using python mainly with Flask, SQLAlchemy and Celery. The infrastructure is primarily handled with Docker and Python libraries such as Click.

- Development of new features and bug fixing in the back-end, updating libraries, code refactoring and task supervision during pagerduty cycle.
- General maintenance of the frontend of a particular interface, written in the React ecosystem.

Senior Python Developer Globant, Bogotá, Colombia 09/17 - 09/18

Backend development in python for general projects, currently focused in projects for National Geographic, primarily in Django.

- In charge of implementing the security guidelines for the Your Shot project, including migration to HTTPS and implementation of better text parsing and restriction techniques.
- Member of the SWAT team, in charge of providing backend support for other teams.
